SUMMARY

I am able to make advanced web applications. I am developing a project with a design pattern suitable for corporate architecture. I also do the database operations myself, creating all the necessary layers. I also code the frontend part because I know a good level of CSS, Bootstrap and JavaScript. I don't write spaghetti code. I write all the necessary algorithms in the simplest way. I follow the principles of clean code, I don't repeat the code. I create the necessary interfaces, classes and methods. When making web applications, you can use C#, .NET MVC, .NET CORE, PHP, NODE.I use JS, REACTJS, ANGULAR JS.

EDUCATION

2014 .09-2016.06

Beykent University
Associate's degree, Department Of Computer

Technologies · (2014 - 2016)

WORK EXPERIENCE

2016 .09-2016 .06
(5 Mount)

Hedef Bilgisayar
Web Development Intern
Student Stajyer   (5 Mounts)
Istanbul, Turkey

2019 .07-Present

Fornax A.Ş

Front-end Developer Fornax A.Ş

2019 - Present (2 Years 8 Mountr)

İstanbul, Türkiye
